

# MONTHLY CRIB SAFETY INSPECTION FORM for FAMILY CHILD CARE PROVIDERS

Use one form per crib & Use reverse side for annual certification.

**A. Crib's brand name** \_\_\_\_\_ **B. Crib Model number** \_\_\_\_\_ **C. Crib number (if numbered)** \_\_\_\_\_

A & B **must be** completed for every crib used or accessible to any child in care. If you do not have the cribs brand name and model number, the crib may not be used.

Effective December 28, 2012, the licensed program must maintain documentation that meets federal documentation requirements to show that every full-size and non-full-size crib that is used by or is accessible to any child in care is compliant with federal crib standards under Code of Federal Regulations, title 16, part 1219, for full-size baby cribs, or Code of Federal Regulations, title 16, part 1220, for non-full-size baby cribs.

(Note inspection date under "date". All items must be inspected each month. Document actions taken on back.)

Monthly Safety Inspection	Date											
Document date of review on this line (MM/DD/YEAR)												
<b>Cribs/Portable Cribs</b>												
<b>Any product of rigid construction – wood, metal full size &amp; non-full-size</b>												
1. No mattress supports can be easily dislodged from any point of the crib												
2. No screws, bolts, or hardware are loose or not secured, and there is no use of woodscrews in components that are designed to be assembled and disassembled by the crib owner												
3. No sharp edges, points, or rough surfaces are present												
4. No wood surfaces are rough, splintered, split, or cracked												
5. No unacceptable gaps between the mattress and any sides of the crib are present at any of the mattress support positions:												
a. When the noncompressed mattress is centered in the <b>non-full-size crib</b> , the gap between the perimeter of the mattress and the crib is not greater than ½ inch at any point.												
b. When the noncompressed mattress is placed against the perimeter of the <b>non-full-size crib</b> , the resulting gap between the perimeter of the mattress and the crib is not greater than 1 inch at any point.												
c. When the noncompressed mattress is centered in the <b>full-size crib</b> , the gap between the perimeter of the mattress and the crib is not greater than 11/16 inch at any point.												
d. When the noncompressed mattress is placed against the perimeter of the <b>full-size crib</b> , the resulting gap between the perimeter of the mattress and the crib is not greater than 1- 3/8 inch at any point.												
6. Crib sheet fits tightly on the firm mattress and overlaps mattress so it cannot be dislodged by <b>pulling on the corner of the sheet</b>												
<b>Play Yards/Pack &amp; Play/Play Pen Crib</b>												
<b>Any product with mesh, net, screen, or fabric siding</b>												
1. No screws, bolts, or hardware are loose or not secured, and there is no use of woodscrews in components that are designed to be assembled and disassembled by the crib owner												
2. No sharp edges, points, or rough surfaces are present												
3. No tears in mesh/net/screen of fabric sides												
4. No mattress pads exceed 1 inch												
5. No unacceptable gaps between the mattress and any sides of the crib are present:												
a. When the noncompressed mattress is centered in the crib, the gap between the perimeter of the mattress and the crib is not greater than ½ inch at any point.												
b. When the noncompressed mattress is placed against the perimeter of the crib, the resulting gap between the perimeter of the mattress and the crib is not greater than 1 inch at any point.												
6. Crib sheet fits tightly on the firm mattress and overlaps mattress so it cannot be dislodged by <b>pulling on the corner of the sheet</b>												

Place a plus (+) for meets requirements or a minus (-) for does **not** meet requirements for each applicable item.

Upon discovery of any unsafe conditions during the safety inspection, immediately remove the crib from use and ensure the crib is not accessible to children. As soon as practicable, but not more than two business days after the inspection, remove the crib from the area where child care services are routinely provided and make necessary repairs or destroy the crib. Manufacturers of mesh sided cribs do not recommend the mesh be altered, therefore if there is a tear in the mesh, it cannot be repaired and may not be used. Document the action(s) taken regarding unsafe cribs on the reverse side of this form.
